- A. 0.108
- B. 0.270
- C. 0.369
- D. 0.500

ANSWER: C**QUESTION NO: 2**

When used together for variables data, which of the following pair is the MOST useful in preparing control charts?

- A. AQL, p-bar
- B. p, n
- C. X-bar and R
- D. R, sigma

ANSWER: C**QUESTION NO: 3**

Analysis of data on all product returns is important because

- I. Failure rates change with length of product usage.
- II. Changes in design and in customer use are often well reflected.
- III. Immediate feedback and analysis of product performance becomes available.

- A. I only
- B. I and III only
- C. II and III only

D. I, II and III

- E. Failure rates change with length of product usage.
II. Changes in design and in customer use are often well reflected.
III. Immediate feedback and analysis of product performance becomes available.

ANSWER: D

QUESTION NO: 4

The weight of paint cans is considered

- A. Discrete data.
B. Continuous data.
C. Random data.
D. Probability data.

ANSWER: B

QUESTION NO: 5

Of the services listed below, which one performed by design engineering is of particular interest to QA personnel?

- A. Audit reports.
B. Cost reports.
C. Change action.
D. Rework criteria.

ANSWER: C

QUESTION NO: 6

The expression below is which of the following?

$$P(x) = {}_n C_r p^x q^{n-x}$$

- A. General term for the Poisson distribution.
- B. General term for the Pascal distribution.
- C. General term for the binomial distribution.
- D. General term for the hypergeometric distribution.

ANSWER: C

QUESTION NO: 7
