QUESTION NO: 1

Which of the following statements of remote replication functions of array is correct?

- A. copy divided into synchronous replication and remote replication
- B. copy divided into asynchronous replication and remote replication
- C. copy divided in to inside this array replication and remote replication
- D. copy divided into synchronous replication and asynchronous replication

Answer: C

QUESTION NO: 2

Substitution method is to use a normal part to replace a suspected abnormal part, so as to achieve the parts of the aim of locating faults and troubleshooting, can be a fiber optic jumper, a cable, a controller or a cascade module.

- A. True
- B. False

Answer: A

QUESTION NO: 3

Under AIX platform, what command is to check the host mounts all devices?

- A. cfgmgr -v
- B. lspv
- C. lsdev -Cc disk
- D. rmdev -dl hdisk2

Answer: B

QUESTION NO: 4

Main technical or functional of S5000T storage systems to enhance the reliability of the data are cache may fall protection, disk copy, global hot standby disk.

- A. True
- B. False

Answer: A

QUESTION NO: 5

In SAN storage network deployment, which of the following opinions of optical switches zone are correct? (Select 3 Answers)

- A. the recommended way is that a zone only has two ports, one belongs to the starter, the other belongs to the target
- B. a port can belong to multiple zones
- C. zone's type can be divided into hard zone and soft zone
- D. under the condition of optical switch cascade, the same zone port cannot be distributed on the two switches

Answer: A, B, C

QUESTION NO: 6

ISCSI is based on TCP/IP protocol, the default service port is?

- A. 3260
- B. 8088
- C. 8443
- D. 3206

Answer: A

QUESTION NO: 7

In video monitoring business, RAID levels of the array recommend choosing RAID10, in order to achieve higher performance requirements.

- A. True
- B. False

Answer: B

QUESTION NO: 8

About RAID, which of the following description are correct? (Select 3 Answers)

- A. RAID5 recommended the number of member disk is 5 to 9, RAID10 recommended the number of mirror in group is 2
- B. capacity of RAID5 is $N-1 / N$, N is the number of member disk
- C. capacity of RAID10 is N/M , N is the number of member disk, M is the number of mirror in group
- D. when the pressure of front-end is enough, the performance of Raid5 write bandwidth and Raid10 bandwidth are same

Answer: A, B, C

QUESTION NO: 9

About the storage array, which LUN copy function is true? (Select two Answers)

- A. when create LUN copy , you can use one virtual snapshot of LUN as the source of LUN
- B. when create increment LUN copy, you can use external array as the source of LUN

- C. when create full capacity of LUN copy, the source of LUN and target of LUN can't be located in the external array at the same time
- D. multiple LUN copy can share same target of LUN

Answer: A, C

QUESTION NO: 10

UltraPath multipath software supports multiple network connection mode, and the most simple way of connecting method is directly connected network.

- A. True
- B. False

Answer: A
