**ANSWER: B**

### QUESTION NO: 9

In the screenshot, which element of the Arrange-Act-Assert pattern corresponds to the Act in a QUnittest?

A. `this.calculator.press("1")`

360° Research, Scoping, Synthesis

The developer needs to create the test during development

Create a js file in the Util folder to allow the customer to add custom code

B. `teardown : function() {}`

Scoping, Synthesis, Ideation

End-to-End tests are NOT recommended

Define a new function name ensuring it is reserved for the extension

C. `QUnit.module`

Scoping, 360° Research, Synthesis

It never causes a test to fail

Identify a strategic location in the controller for the customized code

D. `QUnit.test`

Scoping, 360° Research, Ideation

Testing across more than one page is NOT possible

Add a code snippet to check if the method exists and execute it

E. Modify the bootstrap option to allow multi-layer extensions of the custom code

**ANSWER: B C D**

### QUESTION NO: 10

Why does SAP Fiori use an intent-based navigation?

A. Apps targets can be deployed separately

B. App implementation make the app deployment easier

- C. The concrete app targets can be deployed separately
- D. Apps can be developed and deployed in parallel

**ANSWER: B**
