- B. It can be executed faster than the simple workflow.
- C. It works with easily maintainable decision tables and is highly adaptable to customer needs.
- D. It is pre-configured for dedicated SAP MDG domains and CANNOT be changed.

ANSWER: C

QUESTION NO: 11

SAP MDG is a state-of-the-art MDM solution that provides out-of-the-box, domain-specific master data governance to centrally create, change, and distribute, or to consolidate master data across your complete enterprise system landscape. SAP MDG centrally governs and consolidates master data for your enterprise as follows:

- A. Governance:** Enables governance, compliance, and transparency of master data during creation and change through integrated staging, approval, and central audit trail.
- B. Consistency:** Delivers consistent definition, authorization, and replication of key master data entities. Eliminates error prone manual maintenance processes for master data in multiple systems.
- C. Consolidation:** Consolidates master data in any enterprise system landscape, creates best records and key mapping between duplicates, and optionally combines consolidation with central governance for sustained master data quality.
- D. Integration:** Provides native integration in SAP solutions, including re-use of data model, business logic, and configuration for validation while offering openness to integrate third-party services.
- E. None of the above.**

ANSWER: A B C D

QUESTION NO: 12

In which SAP Master Data Governance customizing activity can you define the SLAs (days and hours by priority)?

Please choose the correct answer

- A. Define Priorities for Change Request**
