QUESTION NO: 1

Virtual machine desktops using GPU pass-through technology will lose hot migration, HA and other features

A. Yes

B. Wrong

ANSWER: A

QUESTION NO: 2

Which of the following are the main functions of FusionCare? (Multiple choice)

A. Health check

B. Root cause analysis

C. Information collection

D. Capacity planning

ANSWER: A C

QUESTION NO: 3

Each Cell in OpenStack contains an independent Message Broker and Database, of which API Cell mainly contain

nova-api service,

Used to receive user requests and send user requests to the specified Cell in the form of message.

A. Correct

B. Error

ANSWER: B

QUESTION NO: 4

When designing the Huawei desktop cloud, which of the following should be considered when planning storage? (Multiple choice)

A. Type of storage media

B. Purpose of storage

C. Storage capacity

D. File system used for storage

ANSWER: A B C

QUESTION NO: 5

Which statement is correct about initializing FusionAccess?

A. The administrator user who uses FusionCompute connects FusionCompute to FusionAccess

B. Create at least one Domain Admin account in AD to connect AD with FusionAccess

C. You need to enter the management plane address when configuring the vAG/vLB address

D. DNS address is an optional parameter

ANSWER: C

QUESTION NO: 6

VNC models include: (multiple choice)

A. Quota

B. Physical resources

C. Service

D. Template

ANSWER: A C D

QUESTION NO: 7

In all-media editing application scenarios, the recommended high-definition graphics desktop technology for desktops running 25m-level expression editing tasks is

A. CPU sharing

B. CPU hardware virtualization

C. GPU hardware virtualization

D. GPU pass-through

ANSWER: C

QUESTION NO: 8

What are the correct statements about the login process of a Huawei desktop cloud user after clicking a virtual machine on the WI?

A. TC establishes a login connection with the virtual machine

B. HDC check whether lic is satisfied

C. HDC sends the username and password to the virtual machine

D. The virtual machine uses the domain account and password to log in to the AD for login authenticatio

ANSWER: A B C D

QUESTION NO: 9

The storage types that can be used to create virtualized data storage in fusioncompute are: (multiple choice)

A. FC SAN

B. NAS

C. IP SAN

D. Fusionstorage

ANSWER: A B C

QUESTION NO: 10

After major operations are performed on FusionAccess, the system may be abnormal. At this time, it needs to be rolled back and restored.

turn off

Yu retreats and resumes Is the law correct? bbs.hh010.com

A. It is preferred to use periodic backup data to restore, because the data is used normally when backed up.

B. Restore all component data in the order of installation and deployment of FusionAccess

C. View the alarm, determine the failure time of the alarm component, and select the closest backup file before the failure time to restore

D. Start the recovery directly after confirming the recovery of the data

ANSWER: C

QUESTION NO: 11

Which virtual disk type is used by Fusioncompute to connect to the cloned virtual machine's differential disk:

A. Fixed disk

B. Differential Disk

C. Dynamic Disk

D. SSD

ANSWER: B

QUESTION NO: 12

In the Huawei desktop cloud, what are the key technologies of the GPU hardware virtualization desktop solution? (Multiple choice)

A. Hardware virtual GPU

B. High-density concurrency

C. Low latency display

D. Virtual desktop exclusive GPU hardware

ANSWER: A B C D

Virtualization is divided into a few sentences such as virtualization, bare metal virtualization, and hybrid virtualization, etc. Since a few sentences of virtualization are easy to implement, they have become mainstream

Commercial virtualization

A. Yes

B. Wrong

ANSWER: B

QUESTION NO: 14

Desktop cloud supports abnormal data recovery of management nodes

A. Yes

B. Wrong

ANSWER: A

QUESTION NO: 15

The functions of the vDesk desktop optimization tool include: (multiple choice)

A. One-click check

B. System acceleration

C. Display optimization

D. Performance statistics

ANSWER: A B C
