- B. Major is a change to one of the first three decimals of the OneFS version while Minor is a change to the last digit.
- C. Minor is for code patches and Major is for Maintenance releases.
- D. Minor includes core operating system changes and Major is for core operating system changes and new OneFS functionality.

**ANSWER: A**

#### QUESTION NO: 6

A customer has received an alert regarding a disk drive failure on node 2 of a 4 node cluster running OneFS 7.x. What isi command should be used to investigate which disk has the problem?

- A. isi devices -d 2
- B. isi status -d 2
- C. isi devices -n 2
- D. isi config >>> status

**ANSWER: A**

#### QUESTION NO: 7

What are the Isilon recommendations for the internal Infiniband network?

- A. 128.221.252.x, 128.221.253.x, 128.221.254.x
- B. 10.1.1.x, 10.2.2.x, 10.3.3.x

- C. 192.168.1.x, 192.168.2.x, 192.168.3.x
- D. 10.x.x.x, 172.16.x.x, 192.168.x.x

**ANSWER: A**

#### QUESTION NO: 8

What are the three sections of an event type number?

- A. Category, Subcategory, ID number
- B. Node Number, Node Event ID, Master Event ID
- C. Type, Severity, Value
- D. Phase Number, Task Number, Item Number

**ANSWER: D**

#### QUESTION NO: 9

The SmartPools settings of your cluster are set to Protection management: Including File with manually-managed protection settings is not checked.

How can the protection settings be modified?

- A. Using File System Explorer in the web administration interface or the isi set command
- B. Only by using File System Explorer in the web administration interface
- C. Only by using the isi set command
- D. Manually starting the SmartPools job

**ANSWER: A**

#### QUESTION NO: 10

A customer is using HP OpenView management software and reports that SNMP data for the Isilon cluster is indecipherable.

How can this be resolved?

- A. Download Isilon MIBs from the cluster or from Isilon Knowledgebase.
