QUESTION NO: 1

Which statement is true about enabling database encryption in FileMaker 13?

A. Shared IDs are required to match for opening multiple files.

B. Open storage can be enabled on encrypted files when hosted on FileMaker Server 13.

C. A container field's external storage setting (open or secure) cannot be modified after the database is encrypted.

D. FileMaker Pro 13 clients will need to supply the encryption password, and a valid account name and password to open a file hosted on FileMaker Server 13.

E. Selecting Automatically open databases (on server) after upload will open encrypted files on the server when a server Administrator account is used to upload.

ANSWER: B

QUESTION NO: 2

Which two statements are true about Touch keyboard types? (Choose two.)

A. The keyboard can be suppressed.

B. The setting has no impact on clients using FileMaker Pro.

C. The keyboard assigned to a field can be installed via a script.

D. The default keyboard for a field can be set under Field Options.

E. The default keyboard for new layout objects is Default for Data Type.

ANSWER: B E

QUESTION NO: 3

A FileMaker 13 solution has a Customer table and a related Contact table. The relationship from Customer to Contact is configured to create related records in the Contact table. On the Relationships Graph, an external table occurrence called Invoice is referenced and is related to the Customer table. The solution has layouts based on the Customer, Contact, and Invoice table occurrences. The following script is used:

Script A:

New Record/Request

A button that performs Script A has been placed on the Customer layout in a portal that displays the related Contact records.

Which two statements are true about this situation? (Choose two.)

A. When the button is clicked, a new record is created in the Contact table.

B. When the button is clicked, a new record is created in the Customer table.

C. If the user is on the Contact layout and runs Script A from the Scripts menu, a new record will be created in the Contact table.

D. Without a Go to Layout script step, Script A cannot be run from the Scripts menu and create a new record in the Invoice table.

E. If the user is on the Customer layout and runs Script A from the Scripts menu, a new record is created in the Customer table, and a new related record is created in the Contact table.

ANSWER: B C

QUESTION NO: 4
