**QUESTION NO: 1**

What does adding a task to a mutually exclusive task set mean?

- A. The task must have a pre-condition
- B. The task must be manually completed
- C. All tasks in that set must be completed
- D. If you complete one task in the set, you cannot complete any of the other tasks in the set

**ANSWER: D**

**QUESTION NO: 2**

At a company, the more advanced workflow users are requesting the ability to monitor the progress of certain workflows that they recently launched. They would like to see which steps have been completed, when they were completed and which steps are currently active.

How can this capability be provided?

- A. Provide those users with access rights to the Process Tracker application so they can monitor their workflows
- B. Provide those users with access to the Process Administrator tool so they can search the Roster and open the work item to check the status
- C. Use Process Designer to edit the workflow map. Open the Workflow Properties and under Workflow Groups tab, assign those users to the F\_Trackers workflow group, then save the workflow map.
- D. Using Process Administrator, use Edit search mode to search for the work items or workflows that meet the criteria then while selecting one or more rows in the result pane, click on Tasks menu, select Trackers and add those users.

**ANSWER: D**

**QUESTION NO: 3**

How can you model the directing of work to case workers? (Choose two)

- A. You associate roles with steps in the Step Editor
- B. You associate roles with Case Tasks in Case Builder
- C. You specify workgroups as a property of a Case Task
- D. You associate workgroups with steps in the Step Editor
- E. You can assign a specific user to a step in the Step Editor

**ANSWER: A D**

**QUESTION NO: 4**
